

## **Eggs Over Easy**

All members must participate

At the sound of the whistle your team will have 12 minutes to:

Lash together one tripod with the larger spars and place between the two ropes

Lash together another tripod using the dowel rods and place in the circle with the Nest (Frisbee) on top.

Once they are in place they cannot be moved

Groups will be positioned on either side of the ropes and large tripod

Once positioned the dam breaks and the area between the ropes cannot be crossed

Throw the rope over the tripod and secure the container to one end.

Tie the other end using a bowline to one of your members to be the anchor

One person hands an egg(ball) to another who puts it into the container they swing the container over. Any time an egg(Ball) touches the ground it is dead and cannot be used.

A person on the other side takes the egg(ball) out and gives it to another for safe keeping. Eggs(balls) must be visible at all times and cannot ever touch the ground

This continues until all eggs(balls) are used or the patrol decides they cannot save any more

Once all eggs(balls) are across they all need to be moved together by one member of the patrol to the nest for counting. Eggs(balls) must be visible at all times and cannot drop or break. Any Eggs( balls) that touch the ground prior to the nest are out of play.

When complete give your cheer and record time

\_\_\_\_\_

Equipment needed per station

5 red balls

10 white balls

3 spars

3 dowel rods

2 5 ft pieces of 5/50 cord
