

Game C Rescue Wilson Instructions

Be strong; Be calm; Be clear; Be careful.

1. Your team must lash together a device that will allow you to rescue persons (Wilson) from the second floor window.
 2. A bucket of balls are hung in a tree to represent Wilsons to be rescued from the second floor window.
 3. Your team must make a lifesaving net out of a hose hoop and blanket provided to rescue Wilson balls fireman style.
 4. Also tie four tether ropes to the hose hoop (tie the "un-knoted" ends to the hoop). The lifesaving net will be supported by the tether ropes. Once the balls have started dropping, everyone is to hold the tether ropes past the knot away from the lifesaving net.
 5. One person will have to climb the device you made and rescue all the Wilsons by hand. Drop one at a time onto the lifesaving net. The lifesaving net must stay behind the marker on the ground.
 6. For safety, one member shall always provide support to the climber while on the device.
 7. A person can only retrieve a maximum of 5 balls then they need to switch the team member retrieving the balls.
 8. Four people must support the lifesaving net with the tether ropes. Once the balls have started dropping, no one is to touch the hose hoop or blanket.
 9. Scoring: Most balls caught and remaining on the lifesaving net after all balls have been removed from the bucket. If a ball falls on the ground, it must stay on the ground.
 10. Give your patrol yell when you have emptied the bucket.
 11. After your number of Wilsons have been counted by the game staff, please replace the balls in the bucket, disassemble your device and replace all the materials where you found them. You can take your blanket with you.
- THANK YOU!

Readyman: Be strong; Be calm; Be clear; Be careful.

Note: The Guide to Safe Scouting requires the maximum distance from the bottom of a scouts shoe to the ground shall not exceed 6 feet.

Game C Rescue Wilson

Materials (10 sets):

Totals

• 2 - 8 foot 2" x 4"	20	Supplied by Bud
